

Testimonials

Course Testimonials

"This course was well-run by both yourself, Stephen and the staff at Dental FX who I found to be very amiable. The atmosphere on the Friday was relaxed and having heard Stephen speak before I wasn't surprised to find his subject matter well-researched and confidently laid out. I would recommend this sinus lift course to those considering making the transition from routine placements to more advanced maxillary treatment plans. Stephen clearly backs up his surgical expertise with sound knowledge of the prosthetic protocols and, in the West of Scotland, an unrivalled bank of experience. I hope to involve myself with Stephen when embarking on sinus lift treatments soon" **Dr Brendan Murphy**

"I have attended a couple of sinus courses over the past 5 years, but have never been comfortable about the procedure until the recent course with Stephen. During the 2 day course, background theory and clinical techniques were discussed. The full patient journey was covered, from assessing the patient and interpreting CT scans to the clinical procedure and post operative care. There was a hands-on component to the course which enabled delegates to put the theory into practice using high quality models. Stephen performed a live demo of the sinus lift procedure which we all found helpful as it allowed us to clearly see step by step how it should be performed. The excellent audiovisual set-up meant we could all see and hear clearly at all times during the surgery. After the course, I felt confident about the procedure and have no qualms about recommending it to my patients"

Dr Michael Tang.

"Very informative and well presented course. Delivered exactly what I was looking for" **Dr Brian Mcmillan**

"The sinus lift course run by Dr Stephen Jacobs at Dental FX is well suited for any dental implantologist wanting to expand his or her surgical repertoire to include sinus augmentation procedures. The course venue is fitted with excellent audio-video support for transmission of live surgery. Working in a small group of six to eight people, makes for a highly interactive and enjoyable learning experience paced over two days. Stephen and his staff are very supportive and offer plenty of advice, especially on the pitfalls to avoid for a beginner starting with sinus surgery. I would highly recommend this course to anyone" **Dr Hemant Yadav**

Sinus Lift Course

Dr. Stephen Jacobs

24th-25th February 2012
21st-22nd September 2012

Sinus Lift Course

Dental Implants have become a major part of dentistry today. More and more patients as well as clinicians seek a fixed or stable implant prosthesis giving patients a functional and esthetic solution for their needs. This has led to an increase in the number of sinus lift procedures in order to achieve the optimum bone foundation for implant placement.

This Sinus Lift Course is designed for dentists who have working knowledge and experience in basic dental implant placement and would like to further their skills with sinus lift procedures.

Attendees will learn the principles and surgical procedures required for Sinus Lift and implant placement. Participants will have the ability to practice the course material through hands-on workshops and post-course mentoring.

Dr. Stephen Jacobs

Stephen qualified from Birmingham University in 1985 and went into general dental practice. He started in implant dentistry in 1992 and since then has placed/restored over 3000 implants and has carried out over 500 sinus graft procedures. His training was carried out in the UK, USA and continental Europe and he now lectures extensively on the subjects involved in the practice of dental implantology. Stephen runs his implant referral practice in Glasgow, where all aspects of implant dentistry are carried out.

He is an active member of the Academy of Osseointegration and is currently president of the Association of Dental Implantology (ADI). Stephen is also on the teaching staff for the University of Salford MSc course in implant dentistry. He is on the editorial board of Dental Implant Summaries, producing summaries for each issue of the journal. Together with a colleague, he runs a comprehensive one-year training course in dental Implantology.

Mentoring

As part of the course, a further session will be made available at a later date for each delegate, for mentoring with one of their own cases.

Delegates Will Gain 10 CPD Hours On Completion Of This Course

Sinus Lift Course Outline

Program Outline

- Friday Morning: Lectures
- Friday Afternoon: Hands on and Case Discussion
- Saturday Morning: Case Discussion cont and Live Surgery

Objectives Of The Course

After the course, participants should be able to understand the following with respect to sinus bone augmentation;

- Diagnosis
- Treatment Planning
- Execution
- Alternatives
- Biomaterials

Lectures

- Biological Foundation
- Indications and Contraindications
- Evidence based decision making
- Biologically based surgical technique
- Experience based complication management

Hands-on

Application of lessons learned on plastic sinus models

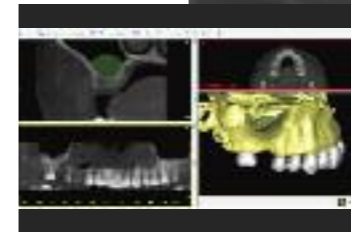

- Sinus lift and graft material placement
- Harvesting of particulate autogenous bone
- Bone substitutes
- Membrane handling
- Simultaneous implant placement

Case Discussion

Delegates are encouraged to bring radiographs/scand/models of prospective cases for discussion and potential future treatment in a mentoring session.

Live Surgery

Dr Jacobs will carry out at least one sinus bone augmentation on a live patient.

Course Venue

Dental FX in Glasgow, Scotland, is a functioning centre for implant and reconstructive dentistry. A full range of courses are held at the centre, with a conference area, full audio-visual set-up for broadcasting live surgical procedures and modern lecture facilities.
